Do not disconnect modules when they are energized!
Repairs on SM line section are to be carried out only with isolating transformer.
The receivers have been awarded the VDE seal and fulfill completely the safety requirements of the VDE.

Ne pas retirer les modules lorsqu'ils sont sous tension!
N'effectuer les travaux de maintenance sur le bloc d'alimentation SM qu'avec un transformateur d'isolement!
Les appareils portent le signe VDE (de l'Union des Electriciens Allemands) et sont absolument conformes à ses prescriptions de sécurité.

Bausteine nicht unter Spannung ziehen!
Servicearbeiten am SM-Netzteil nur über Regeltrenntrafo durchführen!
Die Geräte tragen das VDE-Zeichen und erfüllen in vollem Umfang die Sicherheitsbestimmungen des VDE.

The chassis is isolated from line voltage. The isolation point is in the line section. In order to insure safety as per VDE requirements, the following must be checked after any repairs:

1. Check for air gap and leakage paths! For example, protruding ends of wires passing through the board must be cut off short.
2. Components with an essential safety function ⚠ are to be replaced only with original-equipment parts (see circuit diagram).

Le chassis est séparé du réseau. La séparation est située dans la partie alimentation. Pour assurer la sécurité lors d'une réparation, il convient de veiller à:

1. Utiliser un transformateur d'isolement pour effectuer les travaux de maintenance sur la partie reliée au secteur. Prévenir les risques de court-circuit. Par ex. couper court les connexions des composants échanges.
2. N'échanger les éléments de sécurité ⚠ que contre des pièces de rechange d'origine (cf. schémas d'implantation).

Das Chassis ist netzgetrennt. Die Trennstelle liegt im Netzteil. Um die VDE-Sicherheit zu gewährleisten, ist nach einer Reparatur sicherzustellen:

1. Auf Luft- und Kriechstrecken achten! Z. B. durchstehende Drähte ausgewechselter Bauelemente kurz abschneiden.
2. Sicherheitsbauteile ⚠ nur gegen Original-Ersatzteile auswechseln (siehe Stromlaufplan).

Service-Mode Chassis ICC9

1.Switching on Service Mode

1.1 Switch the TV set to stand-by using the remote control.
1.2 Switch the set off using the main switch.
1.3 Press the blue (VT) button, hold down and switch on the set with the main switch.
1.4 The following menu appears after repeatedly pressing the blue button.

SET-UP	VIDEO	GEOM
xxx 123456789		Configuration

Important: The service mode cannot be switched on if any equipment is activated at the scart socket, i.e. switching voltage is present.

2. Function Selection

The +/- button selects the menu containing the function to be aligned. Pressing the blue button selects the function to be aligned.
With buttons 1-4 you select the number of visible menu lines.

3. Switching between Service- and TV-mode

In Service Mode the normal TV function cannot be operated. If they are required in Service mode (e.g. program change) press the TV button to get into the normal TV mode. By pressing the blue button you return to the Service mode.

4. Alignment of the selected function and storing

The current value of the selected function is given in hexadecimal form on the right-hand side of the alignment position, and can be changed for alignment purposes using the + or - button on the remote control.
To recall the previous values select the function RESTORE and press the + button. To store the modified values of each menu, select the function STORE and press the + button.
In the function ROM you can load the software default values. They are not very exactly and should be used only in special cases.

5. Leave Service-Mode

To leave the Service-Mode switch the TV-set to stand by or switch off with the main switch.

Mode service Chassis ICC9

1. Activation du mode service

1.1 Commutez le téléviseur en position de veille avec la télécommande
1.2 Mettez le téléviseur hors service par l'interrupteur secteur.
1.3 Tenez la touche bleue enfoncée et mettez simultanément le téléviseur en marche avec l'interrupteur secteur.
1.4 Le menu suivant apparaît après avoir appuyé à nouveau sur la touche bleue

SET-UP	VIDEO	GEOM
xxx 123456789		Configuration

Attention : Le mode service n´est pas accessible si un appareil est connecté à la prise péritélévision.

2. Sélection de la fonction

Selectionner à l´aide des touches +/- de la télécommande la fonction souhaitée (SET UP, VIDEO or GEOM)
Les touches 1-4 déterminent le nombre des lignes de menu visibles.

3. Inversion entre modes service et TV

Les fonctions télévision normales ne sont pas utilisables en mode service. Si elles sont nécessaires en mode service (p. ex. changement de programme), la touche (**TV**) permet de commuter en mode TV. Vous pouvez revenir au mode service en appuyant sur la touche bleue.

4. Réglage des fonctions sélectionnées et mémorisation

La valeur momentanée de la fonction sélectionnée est indiquée sous forme hexadécimale à droite, à côté de la position à régler et peut être modifiée avec la télécommande par la touche + ou - .
La ligne STORE permet de mémoriser les nouvelles valeurs de réglage avec la touche +. La ligne RESTORE permet de rappeler les valeurs mémorisées en NVM avec la touche +. Les valeurs par défaut du logiciel peuvent être chargées en sélectionnant la ligne ROM avec la touche +. Elles ne constituent cependant qu´une approximation du réglage et ne doivent être utilisées qu´en cus de nésessité.

5. Abandon du mode service

Pour abandonner le mode service, commutez le téléviseur en position de veille ou mettez-le hors service par l'interrupteur secteur.

Service-Mode Chassis ICC9

1.Service-Mode einschalten

1.1 Mit der Fernbedienung das Fernsehgerät in Stand-by schalten.
1.2 Das Gerät mit dem Netzschalter ausschalten.
1.3 Die blaue Taste gedrückt halten und gleichzeitig das Gerät mit dem Netzschalter einschalten.
1.4 Das folgende Menü erscheint nach erneutem Drücken der blauen Taste

SET-UP	VIDEO	GEOM
xxx 123456789		Configuration

Achtung: Der Service-Mode läßt sich nicht einschalten, wenn an einer Euro-AV-Buchse ein Gerät aktiviert ist, d.h. die Schaltspannung anliegt.

2. Funktionswahl

Mit den Tasten +/- wird das entsprechende Menü gewählt, welches mit der blauen Taste "durchgeblättert wird".
Die Tasten 1-4 legen die Anzahl der sichtbaren Menüzeilen fest.

3. Umschalten zwischen Service- und TV-Betrieb

Im Service-Mode sind die normalen Fernsehfunktionen nicht bedienbar. Werden diese im Service-Mode benötigt (z.B. Programmwechsel), kann mit der Taste (**TV**) in den normalen TV-Betrieb geschaltet werden. Durch Drücken der blauen Taste gelangt man zurück zum Service Mode.

4. Abgleich der gewählten Funktion und Speichern

Der momentane Wert der gewählten Funktion wird hexadezimal rechts neben der abzugleichenden Position angegeben und kann mit der Taste + bzw. - auf der Fernbedienung verändert werden.
Die Änderungen des jeweiligen Menüs können unter STORE mit der +Taste gespeichert, bzw unter RESTORE und der +Taste rückgängig gemacht werden.
Im Menüpunkt ROM kann man die Software-Defaultwerte laden. Sie sind aber nur eine grobe Annäherung an den noch vorzunehmenden Abgleich und sollten nur im Notfall verwendet werden.

5. Service-Mode verlassen

Zum Verlassen des Service-Mode das Gerät in Stand By schalten oder mit dem Netzschalter ausschalten.

Safety regulations

Service work on television receivers may be carried out only by skilled specialists. The unit should be powered with an isolating transformater when doing so. The safety regulations as per VDE 0680 H are to be observed unconditionally during repairs. Among these are

- The design characteristics of the receiver may not be modified in such a way as to reduce operational safety, examples are covers, cages, mechanically protected cables, air gaps, leakage paths.
- Componends – such as non flammable resistors (NB), fusistors, resistors between metal parts which can be touched and dangerous voltages (such as switch contact sensors), fuses, etc. – should be replaced only with original-equipment parts, they must be installed so that after the repair the unit corresponds to the state in which it left the factory.

⚠ **Replace safety components only with Original spare parts!**

Sicherheitsvorschriften

Servicearbeiten an Fernsehgeräten dürfen nur von unterwiesenem Fachpersonal ausgeführt werden. Dabei soll das Gerät über einen Trenntransformator betrieben werden.
Die Sicherheitsbestimmungen nach VDE 0860 H sind bei der Reparatur unbedingt zu beachten, u.a.

- dürfen die konstruktiven Merkmale des Gerätes nicht sicherheitsmindernd verändert werden, so z.B. Abdeckungen, mechanisch gesicherte Leitungen, Kriech- und Luftstrecken.
- müssen Einbauteile – wie nichtbrennbare Widerstände (NB), Sicherungswiderstände, Widerstände zwischen berührbaren Metallteilen und berührungsgefährlichen Spannungen (z.B. Schaltkontaktplatten), Sicherungen usw. – den Original-Ersatzteilen entsprechen und wieder fachgerecht (Fabrikationszustand) eingebaut werden.

⚠ **Sicherheitsbauteile nur gegen Original-Ersatzteile auswechseln!**

Mesures de Securité

Les interventions de dépannage sur les téléviseurs doivent être effectuées seulement par des techniques compétents.

Il est fortement conseillé d'intercaler entre l'appareil et le secteur un transformateur d'isolement.

Les normes de sécurité suivant VDE 0860 H sont à observer strictement.

Les caractéristiques des appareils ne doivent pas être modifiées. (Par exemple: blindage, câbles fixés mécaniquement, positionnement des composants.)

Lors d'un dépannage il faut respecter impérativement les listes d'équivalerice. (Par exemple: résistance fusible, câble secteur, interrupteur, tube cathodique, etc.)

⚠ **Ne remplacer les composants de sécurité que par des composants originaux!**

⚠ Indicates critical safety components, and identical components should be used for replacement. Only then can the operational safety be garanteed.

Le remplacement des éléments de sécurité (repérés avec le symbole ⚠) par des composants non homologués selon la Norme CEI 65 entraine la non-conformité de l'appareil. Dans ce cas, la responsabilité du fabricant n'est plus engagée.

Wenn Sicherheitsteile (mit dem Symbol ⚠ gekennzeichnet) nicht durch Original - Ersatzteile ersetzt werden, erlischt die Haftung des Herstellers.

La sostituzione degli elementi di sicurezza (marcati con il segno ⚠) con componenti non omologati secondo la norma CEI 65 comporta la non conformitá dell'apparecchio. In tal caso è "esclusa la responsabilità " del costruttore.

La sustitución de elementos de seguridad (marcados con el simbolo ⚠) por componentes no homologados segun la norma CEI 65, provoca la no conformidad del aparato. En ese caso, el fabricante cesa de ser responsable.

MEASUREMENT CONDITIONS - CONDITIONS DE MESURES - MESSBEDINGUNGEN CONDIZIONI DI MISURA - CONDICIONES DE MEDIDAS

RECEIVER : On UHF,input level : 1 mV, bar test pattern :
- PAL, I standard, 100% white.

Via the scart socket, input level : 1 Vpp, bar test pattern :

Colour, contrast and brightness at mid-position, sound at minimum.
Programme selected : PR 01.

DC voltages measured between the point and earth using a digital voltmeter.

RECEPTEUR : En UHF, niveau d'entrée 1 mV mire de barres
- SECAM, Norm L, Blanc 100%.

Par la prise Péritélévision, niveau d'entrée 1 Vcc, mire de barres .

Couleur, contraste, lumière à mi-course, son minimum.
Programme affecté PR 01.

Tensions continues relevées par rapport à la masse avec un voltmètre numérique.

EMPFÄNGER : Bei UHF Eingangspegel 1 mV, Farbbalken :
- PAL, Norm G, Weiss 100%.

Über die Scartbuchse : Eingangspegel 1 Vss, Farbbalken :

Farbe, Kontrast, Helligkeit in der Mitte des Bereichs, Ton auf Minimum.
Zugeordnetes Programm PR 01.

Gleichspannungen mit einem digitalen Voltmeter zur Masse gemessen.

RICEVITORE : In UHF, livello d'entrata 1 mV, monoscopio per barre :
- PAL, norma G. bianco 100%.

Per la presa SCART, livello d'entrata 1 Vcc, monoscopio per barre :

Colore, Contrasto, Luce a metá corsa, Suono minimo.
Programma designato PR 01.

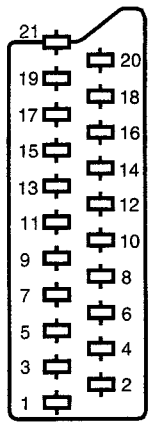
Tensioni continue rilevate rispetto alla massa con un voltametro numerico.

RECEPTOR : En UHF, nivel de entrada 1 mV, mira de barras :
- PAL, norma G, blanco 100%.

Por la toma Peritelevision, nivel de entrada 1 Vpp mira de barra.

Color, Contraste, luz a mitad de carrera, Sonido mínimo.
Programa afectado PR 01.

Tensiones continuas marcadas en relacion a la masa con un voltimetro digital.



NOTE : (MAIN) ... etc. identifies each pcb module.

NOTE : (MAIN) ... etc. repères des platines constituant l'appareil.

HINWEIS : (MAIN) ...usw. Kennzeichnung der Platinen, aus denen das Gerät zusammengesetzt ist.

NOTA : (MAIN) ... ecc. indicazioni delle piastre che costituiscono l'apparecchio.

NOTA : (MAIN) ... etc. marcas de las placas que constituyen el aparato.
